

Advancing AV experiences

APTECH

Advancing AV experiences for AV consultants, integrators, and your clients.

At AP Tech, we understand that integrators and specifiers thrive on their ability to create compelling AV experiences that make good business sense.

It's why everything we do is about helping you to advance AV experiences.

We know that great products are essential but are just the start. Everything must provide both configuration control and setup simplicity. Products must deliver predictable performance and reliability. Support has to be accessible, responsive and helpful. Plus, everything must be in stock and delivered when needed. It's better business that makes it easier to get things done.

That's how AP Tech helps advance AV experiences.

Solutions, technology and industry segments

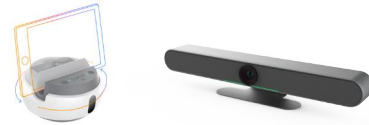

High-performance live video production

Capture, switch, encode, stream and record AV from multiple local and online sources. Distribute anywhere.

Budget-friendly education solutions

Auto-tracking cameras, video distribution hardware, cloud-based collaboration and more. AP Tech has AV products and technologies that facilitate online and hybrid education, develop educators, simplify collaboration and manage local and multi-campus video.

Powerful, reliable AV over IP

AV over IP allows integrators to develop AV capture and display with unmatched flexibility and scalability. Switch, split, matrix and video wall solutions from presentations to stadiums. Imagination is the only limitation.

Space-filling sound

Today's venues, from hospitality, retail and entertainment, are all pursuing the creation of richer experiences. Immersive audio is a key ingredient.

Professional standard video conferencing and network cameras

Designed for professional and business applications. Every product in the range is designed and manufactured to deliver exceptional image quality, professional-standard durability, configurability, systems integration compatibility and outstanding value for money.

The range has been curated and sourced from one of the world's leading manufacturers. Choose from a wide range of cameras with setup controls and feature options that suit your project specs and budget.
